The “New curricula in Precision Agriculture using GIS technologies and sensing data” – CUPAGIS

(Project reference number 597962-EPP-1-2018-1-EE-EPPKA2-CBHE-JP)

Dear Dr. Arnold Sterenharz,

In accordance with recent events and the announcement of quarantine in the world, related to the spread of the virus COVID-19, unfortunately, we have to inform you, that our company will encounter difficulties in terms of fulfilling the conditions of the contracts and the deadlines of the delivery of equipment if we decide to continue the contract.

Since not all recipient universities of equipment have signed the supply contracts, and we have not received to this day any prepayment, we propose to terminate our agreement on mutual agreement and without penalties for both parties, because according to the terms of the shipping contract, the delivery time of the equipment should not exceed 60 days, after the signature of the agreement. We regret to inform you, that due to the logistic situation in the world, our company cannot follow the deadlines of the agreement and cannot specify even the approximate date of the delivery if you will make the order now.

16.03.2020
