

Opening of the CUPAGIS computer class at ENSA, Algiers as part of the high-level conference on precision agriculture

Prof **Abdelkader Laribi** opens the door to the brand new CUPAGIS computer class at ENSA, Algiers. It combines the PAGIS and VCR equipment into one system.

Prof Laribi (second from the left) in the brand-new computer class.

Prof Laribi the centre.

Member of the Algerian Academy of Sciences (in the centre).

Overall view of the CU/PAGIS + VCR computer class. The plastic bags are to protect the devices (all-in-one computers) against dust.

Also, keyboards are protected against dust by plastic covers when not in use. Every device is carefully tagged.

Both students and teachers are happy with this CUPAGIS environment and equipment.

Dr Karim Laabassi (to the right) explaining the outcome to a colleague.
